Status: Active

PMP Technology
A Web Development Firm

PMP Technology is a web development firm primarily focused on the realization of the ideas and creative endeavors of Philip Parzygnat. PMP Technology was founded in 2014. It is in its early inception stages and although the list of projects is great, each of these projects is prospective. What is available for review in this guide is a lifetime of work that Phil will dedicate himself to as he continues to learn what it takes to master the art of web development. Beyond these creative endeavors, PMP Technology also has a growing list of active clients for whom we manage web presence, media, marketing, and social outreach. Client work is listed for completeness' sake yet the only real focus of PMP Technology is to support Phil's philosophical endeavors that came about between 2008 to 2012 in a creative moment of sorts. To learn more about Phil please view the closing pages of this guide. If you are interested in learning more about PMP Technology please visit our website or send an email with your query to info@pmptechnology.com. We look forward to hearing from you.

Tech Incubator at Queens College Projects

Colorblind View

A Tech Incubator at QC Project

Colorblind Simulator
<http://colorblindview.com>
Status: In Development

Colorblind View is a Tech Incubator at Queens College project that simulates the affects of all major conditions of colorblindness against still images in JPEG or PNG form. This is a way to get some insight into the vision impairment for those of us that are fortunate enough to see the full spectrum of color. The process includes research into methods of representing the effects of certain types of colorblindness and using mathematical formulas that map a standard RGB space image into some limited color space (with respect to RGB) that best represents a given condition. The project includes all documentation, process, website, and mobile applications.

If you have any questions regarding this project please send your inquiry to info@pmptechnology.com.

Major Undertakings
Chronological Order

Towards Utopia

<http://towardsutopia.com>

Status: In Development

Towards Utopia

A PMP Technology Property

Towards Utopia is an interactive storybook devoted to Western evolution. The most general theme of Towards Utopia will be the Old Testament's Genesis. This general theme will be used as a foundation to describe the birth and progress of Western thought and its social affects. The story will traverse through human, *in particular Western*, evolution within twelve settings in history. These include, Eden, Babylon, The Nile River Valley, Crete, Athens, The Areas around the Tigris, Rhine, Rome, Danzig, Paris, Orange, and New York City. The objective of this project is to offer a rich storyline along with some deeper motivations as to the nature of relationships within Western evolution. It is said that with modern technology, the best author is one that codes.

If you have any questions regarding this project please send your inquiry to info@pmptechnology.com.

Becurate

A PMP Technology Property

Becurate

<http://becurate.com>

Status: Prospective

Becurate will be an online virtual showcase community powered by the Behance Network. Becurate will take a random sample of creative work from around the world via Behance and creates publications and virtual exhibitions to help the general public discover creatives. Due to the velocity of projects posting to Behance, much creative work is lost on the network. Becurate will offer a window into work that is noteworthy yet lost in the volume.

If you have any questions regarding this project please send your inquiry to info@pmptechnology.com.

Ahmagia

A PMP Technology Property

Ahmagia

<http://ahmagia.com>

Status: Prospective

Ahmagia will be a platform for women to take a leading role in solving today's global issues. Under the premise that women are more essential to solving today's issues than men, Ahmagia will focus on creating an environment in which women collaborate to solve social, political, ethnic, scientific, ..., problems. Men have authoritatively influenced evolution since our naissance. At present, we are trapped in a dark world and many if not all women have something to say based on their interpretation of why things are as they are and how they could be if men adapted to a set of rules defined solely by a female think tank. The true opportunity in asking women to rethink global affairs is that we are allowed to eliminate everything to date and start with a blank slate.

If you have any questions regarding this project please send your inquiry to info@pmptechnology.com.

Cosmopolia
A PMP Technology Property

Cosmopolia
<http://cosmopolia.com>
Status: Prospective

Cosmopolia will be a web based *faux* republic that works within the bounds of modern law. The method of social governance within this republic will be one coined a philocracy where citizens are not individuals, rather they are only entities when couples. A deal of thought will go into this web application at a later time and thus not much more detail is available today. This will be the most notable undertaking of PMP Technology.

If you have any questions regarding this project please send your inquiry to info@pmptechnology.com.

Minor Undertakings
Arbitrary Order

Ano Bio

A PMP Technology Property

Anonymous Biography
<http://anobio.com>
Status: Prospective

Ano Bio or Anonymous Biography will be a spiritual over natural dating site. Considering some men and women never do meet their mate, further physique is amenable. The website offers profiles and interactions as a window into the soul. Testing the limits of our senses by allow for engagement in conversation that is almost unreal and partially on whim. An example would be communication over long distances without two way communication. Where a man and a woman have agreed to communicate, yet only one speaks (typically the man). This way one can gauge how close the two are spiritually.

If you have any questions regarding this project please send your inquiry to info@pmptechnology.com.

Adpartum
A PMP Technology Property

Ad Partum (A Creative)
<http://adpartum.com>
Status: Prospective

A walk into the randomness of creativity. A site dedicated to scripting genius using formal method. In particular, weight will be applied to augmenting artificial intelligence with true randomness across a collection of disciplines to review the affects. For example in painting. This project is still in conceptual stages and as such no further detail can be provided at this time.

If you have any questions regarding this project please send your inquiry to info@pmptechnology.com.

Magical Truths

A PMP Technology Property

Magical Truths

<http://magicaltruths.com>

Status: Prospective

An application dedicated to detaching from what we know to delve into a fabricated reality that can be as distant from what this world is as possible by way of imagination. The means by which participants will detach is by way of combining loose elements of some alternative reality similar to the work of a chemist in taking elements in combination and gauging results. To clarify a bit, we know this world has water, plants, animals, a collection of elements, ..., and that our solar system allows for revolution around the sun. These are things we discovered. Now consider a blank slate. The game involves introducing elements that we have never experienced and then combining these elements to form some alternative universe.

If you have any questions regarding this project please send your inquiry to info@pmptechnology.com.

Kitty Area

A PMP Technology Property

Kitty Area

<http://kittyarea.com>

Status: Prospective

Kitty Area will be a web application dedicated to defining a path by which animals can use technology to deterministically communicate with us. The application is still in its conceptual stages and therefore no further detail can be given at this time.

If you have any questions regarding this project please send your inquiry to info@pmptechnology.com.

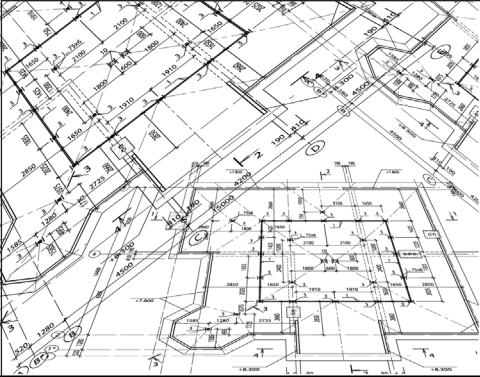

Spell Formation
<http://spellformation.com>
Status: Prospective

About Philip Parzygnat

Philip Parzygnat
<http://philparzygnat.com>
CUNY Queens College
Computer Science 2007/2017

Philip Parzygnat is a writer and digital artist that has an interest in Western philosophy. He began writing in 2008. His college education was diverse and mixed with art, mathematics, and philosophy. His first work was a volume on metaphysics and the state of philosophy and science. This work influenced further work that continues to present.

In his philosophical pursuits Phil is most interested in understanding the rules by which mind is governed. He also dedicates time to conceptualizing improved systems of social governance.

To learn more visit his personal website.
